

iCLASS SE[®] Readers

iCLASS SE Platform

HIGHLY ADAPTABLE AND SECURE HIGH FREQUENCY ACCESS CONTROL SOLUTION

- **Powerfully Secure** – Provides multi-layered security beyond the card technology, providing added protection to identity data using SIOs.
- **Technology-independent** – Supports multiple technologies (iCLASS[®] Seos[™] and iCLASS SE[®] credential platforms, standard iCLASS, MIFARE[®], and MIFARE DESFire[®] EV1).
- **Adaptable** – Interoperable with a growing range of technology environments and form factors including NFC smartphones via Seos.
- **Standardized Communications** – Open Supervised Device Protocol (OSDP) for secure, bidirectional communication.

HID Global's iCLASS SE access control platform goes beyond the traditional smart card model to offer a secure, standards-based and flexible platform that has become the new benchmark for highly adaptable, interoperable and secure access control solutions.

Additionally, iCLASS SE readers support Near Field Communication (NFC) smartphones via Seos, enabling a new class of portable identity credentials that can be securely provisioned and safely embedded into both fixed and mobile devices.

iCLASS SE readers include Open Supervised Device Protocol (OSDP), a new Security Industry Association (SIA) standard that together with Secure Channel Protocol (SCP) provides secure communications and central management.

Ideal for new and existing installations, iCLASS SE readers provide customers the assurance that their existing investments can be leveraged to enhance their system as business requirements change. The technology-independent readers also support iCLASS Seos and iCLASS SE credential platforms, as well as standard iCLASS, MIFARE, MIFARE DESFire EV1 and other leading technologies.

As part of HID Global's iCLASS SE platform – based on HID's Secure Identity Object[™] (SIO) data model and Trusted Identity Platform[®] (TIP[™]) – the powerfully secure iCLASS SE readers offer advanced features such as multi-layered security beyond the card technology and tamper-proof protection of keys/cryptographic operations using EAL5+ secure element hardware.

POWERFULLY SECURE:

- Multi-Layered Security – Ensures data authenticity and privacy through the multi-layered security of HID's SIO.
- EAL5+ Certified Secure Element Hardware – Provides tamper-proof protection of keys/cryptographic operations.
- SIO Data Binding – Inhibits data cloning by binding an object to a specific credential.
- Secured communications using OSDP with Secure Channel Protocol.
- Expanded iCLASS Elite[™] Program – Extends private security by protecting uniquely keyed credentials, SIOs and programming update keys.

HIGHLY ADAPTABLE:

- Near Field Communication (NFC) Card Emulation – Enables migration to HID access control on mobile devices.
- SIO Portability – Provides technology independence and portability to other smart card technologies.

- Allows for support of future technologies.

SUSTAINABILITY AND MANAGEMENT:

- Intelligent Power Management (IPM) – Reduces reader power consumption by as much as 75% compared to standard operating mode.
- Recycled Content – Contributes toward building LEED credits.
- Central management of connected readers using OSDP.

PERFORMANCE:

- SIO Media Mapping – Simplifies deployment of third-part objects to multiple types of credentials.
- Field Programmable Readers – Provides secure upgrades for migration and extended lifecycle.
- RGB LEDs – Delivers increasing capability to notify users and troubleshooters regarding system state.
