

APB-210

WIRELESS CONTROL BUTTON

The APB–210 button is designed to control the operation of various devices (e.g. automation system devices or access control). It can also be used to trigger a panic alarm or call for help. It is designed for operation within the ABAX 2 two–way wireless system. The device is supported by:

- ACU-220 / ACU-280 controller (firmware version 6.08 or newer)*
- ARU-200 repeater.
- encrypted two-way radio communication in the 868 MHz frequency band (AES standard)
- transmission channel diversity 4 channels for automatic selection of the one that will enable transmission without interference with other signals in the 868 MHz frequency band
- device firmware updated remotely
- remote device configuration
- "ECO" option for longer battery life
- battery status control

*The device is not supported by the ACU-220 / ACU-280 controller connected to the VERSA series control panel.
