

L2+ Managed Switch

PRODUCT

DH-PFS5424-24T

L2+ Managed Switch

- 10/100/1000BASE-T port x 20
- Combo 1000BASE-T/SFP port x 4
- Support WEB, SNMP (v1/v2c), TELENET, CLI, Link aggregation
- support Qos , ACL, 802.1X, RMON
- support ERPS, IGMP-Snooping
- Support VLAN Interface, Static Ip Routing
- Protection: Common mode 2Kv
Differential mode 1Kv

DH-PFS9424-24X

L2+ Managed Switch

- 1000M SFP port x 16
- Combo 1000BASE-T/SFP port x 8
- Support WEB, SNMP (v1/v2c), TELENET, CLI, Link aggregation
- support Qos , ACL, 802.1X, RMON
- support ERPS, IGMP-Snooping
- Support VLAN Interface, Static Ip Routing
- Protection: Common mode 2Kv
Differential mode 1Kv

FEATURES

DH-PFS5924-24X /DH-PFS5424-24T is a type of managed switch with layer 2+, which adopts 350G back panel design structure and realizes many functions such as route, port mirroring, port isolation, ARP binding, spanning tree, VLAN, ACL, DHCP snooping, multicast, link aggregation and etc. It is the best choice in small and medium-sized enterprises. Based on VCore-III MIPS-based CPU powerful, stable processing capacity; DH-PFS5924-24X /DH-PFS5424-24T provides exchange capacity up to 350Gbps, port full linear filter forward 35.7Mpps; Guarantee large flow data forward of backbone network without block.

L2+ Managed Switch

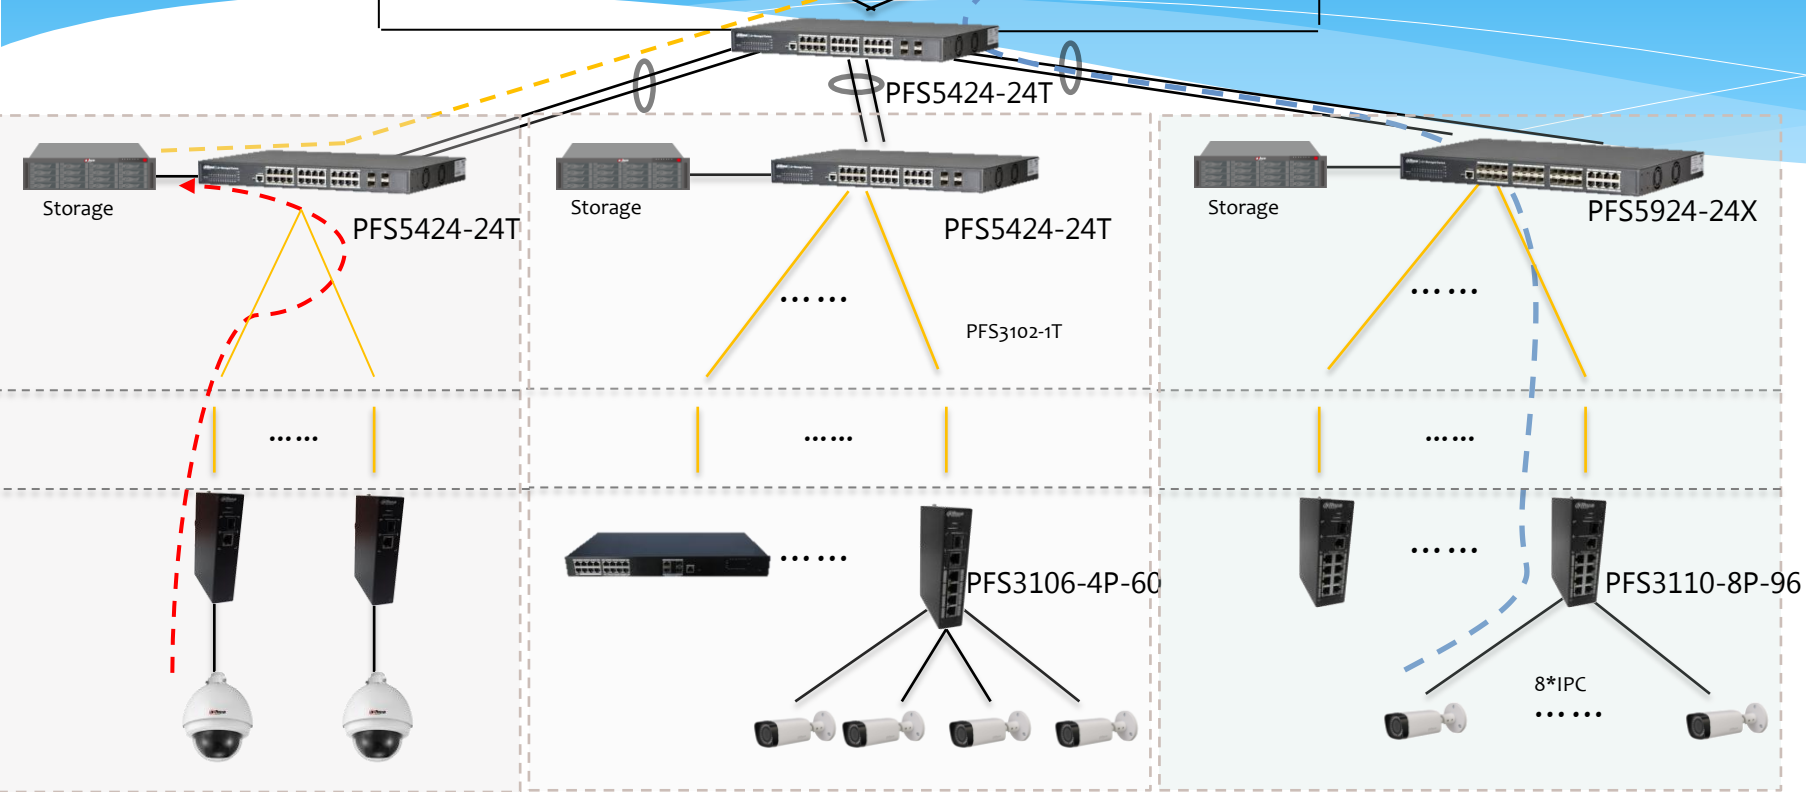

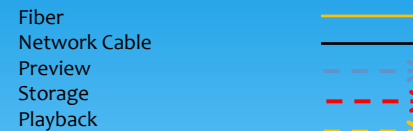

Model	Material No.	Main Features
DH-PFS5924-24X	1.0.01.20.10142	10/100/1000BASE-T port x 20 Combo 1000BASE-T/SFP port x 4
DH-PFS5924-24X	1.0.01.20.10143	1000M SFP port x 16 Combo 1000BASE-T/SFP port x 8

Accessories

Model	Material No.	Main Features
PFT3950	1.0.01.20.10070	1.25G 850nm,500m,LC, Multi-mode
PFT3960	1.0.01.20.10066	1.25G 1310/1550nm,20km,LC, Single-mode
PFT3970	1.0.01.20.10068	1.25G 1550/1310nm,20km,LC, Single-mode

SOLUTION

≤200 in the same network segment

Content	Qty.
Front-end camera	≤200
PFS5424/PFS5924	4
OTE103T	?
PFS3102-1T	?
PFS3106-4P-60	?
PFS3110-8P-96	?
EVS5024	3
DSS7016	1
NKB3000	1
M70-4U	1
Video wall(46")	4

Details

Less than 200 pcs cameras. All network devices in the same network segment. Using distributed storage mode to reduce the pressure of the convergence switch. According to the front-end equipment condition choose corresponding access switches
